

Springfield Area Directory of Environmental Agencies and Organizations

Springfield/Greene County
Choose Environmental Excellence

2012

Welcome to the Springfield Area Directory of Environmental Agencies and Organizations...

...The purpose of this directory is to provide information about government agencies, not-for-profit and member-based organizations serving Springfield and Greene County that are active in protecting our natural environment. The directory has been compiled by Springfield/Greene County *Choose Environmental Excellence* as a service to the community. The directory will be periodically updated to include new submissions as they are received.

In addition to providing contact information for several environmental agencies and organizations, each listing in the directory also provides information that will allow the user to determine which agency or organization will best meet a particular need.

Additions to the Directory, as well as suggestions for improvement, can be made by submitting information to:

Barbara J. Lucks
Springfield/Greene County *Choose Environmental Excellence*
290 East Central
Springfield, MO 65802

U.S. Environmental Protection Agency (EPA)

Branch Region VII

Department Solid Waste

Contact Jim Callier

Position Chief

Section Resource Conservation and
Pollution Prevention Section

Address U.S. EPA Region 7
501 N. 5th Street

City Kansas City, KS 66101

Telephone (913) 551-7646

Fax number (913) 551-7521

Website www.epa.gov/region7

Mission area Solid waste and pollution
prevention including source
reduction, waste prevention,
recycling

Programs available Advisory, regulatory, and
partnership programs

Description:

The *Environmental Protection Agency's* solid waste and pollution prevention programs promote reducing the amount of waste created through source reduction, waste prevention and recycling. The EPA promotes public/private partnerships to achieve these goals through programs such as WasteWise. EPA also promotes safe and effective management and disposal of solid waste including household and commercial garbage and nonhazardous industrial wastes.

U.S. Natural Resources Conservation Services (NRCS)

Branch Greene County Service Center

Contact..... Mark Green

Position District Conservationist

Address..... 688 S. State Hwy. B
Suite 200

City..... Springfield, MO 65802

Telephone (417) 831-5246, ext. 3

Fax number (417) 831-4022

Mission areas..... Agriculture land use, water
quality, animal waste, urban
conservation issues

Programs available..... Technical assistance and
conservation planning, cost-share
assistance to install agricultural
conservation practices.

Description:

Formerly the Soil Conservation Service, the *NRCS* provides conservation planning, technical assistance and cost assistance to clients (individuals, groups, and units of government). These clients develop and implement conservation plans to protect, conserve, and enhance natural resources (soil, water, air, plants, and animals) within their related social and economic interests. Financial assistance programs can help apply these conservation plans on agricultural land.

Conservation planning is a natural resource problem—solving and management process. The process integrates ecological, economic, and social considerations to meet private and public needs. Conservation planning helps clients, conservationists, and others view the environment as a living system of which humans are an integral part. NRCS works with cropland, hayland, pastureland and woodland resources.

NRCS is a Federal Agency under the U.S. Department of Agriculture that works in cooperation with, and provides housing for, the Greene County Soil and Water Conservation District.

Missouri Department of Conservation Nature Center

Branch Springfield Conservation
Nature Center

Contact Linda Chorice

Position Manager

Address 4601 S. Nature Center Way

City Springfield, MO 65804

Telephone (417) 888-4237

Fax number (417) 888-4241

Programs available Advisory, regulatory

Description:

The Public Drinking Water Assistance and Engineering Unit conducts Sanitary Surveys, investigations, and Construction Inspections of public water supplies in 25 Southwest Missouri counties. A public water supply has at least 15 service connections or regularly serves an average of 25 or more persons at least 60 days per year.

Activities of the Unit include:

- Conduct Sanitary Surveys of existing public drinking water supplies
- Investigation of concerns
- Conduct Site Surveys for proposed public water supply wells to identify the sources of potential contaminants
- Track construction activities and conduct all necessary site inspections
- Conduct Construction Inspections for public water supplies with a focus on new public water supplies
- Complete Final Inspections of New Plants and Treatment Plant Improvements, Pumping Stations, Storage Facilities, Wells and Distribution Systems Extensions
- Provide technical assistance to owners/operators of public water supply distribution and treatment facilities
- Conduct operator training activities, including surveys, personal contacts, and needs assessments as well as on-site training in the region
- Supervise the administration of certification examinations in the region
- Respond to citizen and/or operator inquiries regarding interpretation of the operator certification regulations

wildlife, outreach and
sustainability

Projects in 2012

Fire Protection

- Two contractors are hired by Southwest Missouri RC&D to work with fire departments and the public to protect homes, businesses, and land from wildfire in south Missouri; funded fire departments to help pay for Fire Protection Open Houses; funded fire departments to work with homeowners to complete Homeowner Fire Risk Assessments; educated the public about fire protection through billboards; and worked with communities to plan and implement Community Wildfire Protection Plans. Projects funded by USDA Forest Service and co-sponsored by the Missouri Department of Conservation.

Trees for Joplin Fund

- Southwest Missouri RC&D established a “Trees for Joplin” fund with the Community Foundation of the Ozarks to help restore trees to the city ravaged by a tornado in May 2011.

Feral Hog Education

- Educated the public about the dangers of feral hogs and the threat they pose to our land, agriculture, water, and wildlife.

Sustainability

- Participating in Community Foundation of the Ozarks’ Stewardship Ozarks Initiative. Donations to Southwest Missouri RC&D Endowment will be matched 100% and will be used to improve our ability to impact our natural resources and our community for years to come.

<u>Location</u>	Columbia, MO 65211
<u>Telephone</u>	(573) 882-5011
<u>Email</u>	steinwachsme@missouri.edu moeac@missouri.edu
<u>Website</u>	www.missouribusiness.net/eac
<u>Mission areas</u>	Sustainability, waste reduction, pollution prevention
<u>Programs available</u>	Pollution prevention training, interns for industrial P2 research, education, technical assistance

Description:

Since 1991, the University of Missouri Extension’s Office of Waste Management education in pollution prevention and best practices to numerous business sectors from its Springfield, Missouri location. Recently the OWM was integrated into the University of Missouri—Columbia. Now called the Missouri Environmental Assistance Center (EAC), the program combines the capabilities of the College of Engineering and Extension’s Business Development Program.

The EAC offers:

- 1) Pollution prevention assistance for new and expanding business and industries. Engineering interns are available to work on site to evaluate options for your company that will reduce the use of raw materials, energy, water, and other resources through process modifications and better technologies, and by substituting environmentally preferable products, raw materials or packaging. MOEAC’s website has more details and guidelines for businesses wishing to explore their own practices.
- 2) Regulatory compliance assistance – what to expect and where to find it in MDNR and EPA
- 3) Financial Assistance – building environmental savings into business plans and loan applications
- 4) Training on how businesses can reduce waste and cost, in partnership with industry sectors. Businesses can learn how to improve operations and reduce waste through better inventory and supply chain management, maintenance and housekeeping, and employee training.
- 5) Access to research and innovation by the University’s Environmental Scientists and Engineer

Mission areas Solid Waste Management/Recycling

Programs available

Design and implementation of waste reduction programs. District “O” has a staff that is trained and dedicated to helping you find solutions to address solid waste issues at your home, work, classroom, business or community.

Grant preparation assistance for financial opportunities is available through the District, as well as other sources. The District awards annual grants for public and private projects that help meet solid waste reduction goals. *Technical Assistance Educational programs* to teach our youth the importance of recycling and preserving our environment.

Recycling Centers in Waste District “O”

Dallas County – Buffalo – 345-2701

Christian County – Nixa, Ozark, Sparta – 581-2112

Greene County – Fair Grove – 759-2353 Willard – 742-3033 Republic – 732-9253

City of Springfield – Several Locations – Recycling Hotline: 864-1904

www.springfieldmo.gov/recycling

Polk County – Bolivar – 327-7956

Webster County – Marshfield, Seymour – 468-2223

Organization Description

In the early 1990’s, the Missouri Legislature divided the State into several solid waste management districts in an effort to reduce the amount of solid waste disposal statewide by 40%. Solid Waste Management District “O”, formed in 1992, is the result of this State mandate. District “O” includes Dallas, Christian, Greene, Polk, and Webster Counties and the City of Springfield. These entities have been working together for several years to coordinate local environmental efforts, with a commitment to recycling and other waste reduction programs and activities.

An Executive Board consisting of representatives from each member county and the City of Springfield governs District “O” obtaining and sharing information and ideas from county and district advisory boards. The Executive Board works with local residents, businesses, not for profit and governmental organizations to find solutions to solid waste issues. Timothy W. Smith serves as Chair of the Executive Board. District “O” staff works directly with the Missouri Department of Natural Resources in the administration of various grant opportunities. Grant monies are generated through the tipping fees associated with landfill and transfer station disposal for waste.

Greene County - County Commission

Branch..... County Commission
Department.....Resource Management Department
Contact Chris Coulter, AICP
Position..... Director
Address 940 Boonville Ave.
City..... Springfield, MO 65802
Telephone (417) 868-4873
Fax number..... (417) 868-4175
Mission areas.....Land use planning, water quality,
building code enforcement, zoning
Programs available Advisory, regulatory, training

Description:

The Greene County *Resource Management Department*, which operates under the direct authority of Greene County Commission, includes the Planning and Zoning Section, Building Regulations Section and the Environmental Section. Areas of responsibility for Resource Management also include Building Operations & Maintenance for the County Campus.

The Planning and Zoning Section administers land use and subdivision activities in the unincorporated areas of Greene County. This office also deals with growth and development issues and compliance with zoning regulations. The Greene County Geographic Information System maintains the official county zoning mapping cooperation with the Planning and Zoning.

Environmental Section administers the County’s stormwater, sinkhole, erosion and sediment control, floodplain and on-site wastewater system regulations. They review proposed development plans and plats for compliance with environmental regulations, performs field inspections and provides information to developers, consultants and the general public regarding environmental issues. The formation of sewer districts within the County is also administered by this office.

Building Regulations reviews building and site development plans, issues required permits and performs inspections to insure compliance with adopted building codes. Responsibilities also include public health, safety and general welfare, as well as interacting with builders in an effort to address issues that pertain to our local community.

The Director of the *Resource Management Department* is Chris Coulter, AICP. Director of the Planning and Zoning is Kent Morris, AICP. Kevin Barnes, P.E. is the Greene County Stormwater Engineer and supervises the Environmental. Dave O’Dell is the Chief Building Regulations Official, and the Building Superintendent is Dave Dunn.

Greene County - Local Emergency Planning Committee

<u>Department</u>	Local Emergency Planning Committee (LEPC)

<u>Telephone</u>	(417) 869-6040
<u>Fax</u>	(417) 869-6654
<u>Email</u>	rnicholls@greencountyoem.org
<u>Website</u>	www.greencountymo.org
<u>Mission areas</u>	Hazardous material emergency preparedness
<u>Programs available</u>	Advisory, regulatory, public education

Description:

The *LEPC* is the execution arm at the local community level for the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986. The committee is comprised of representatives from organizations and agencies specified by EPCRA. Its primary responsibility is community hazardous material emergency preparedness. It accomplishes that responsibility by collecting hazardous material information from facilities required to file under EPCRA, develops community emergency response plans to respond to these facilities, and provides hazardous materials training classes to community and business emergency response responders. The LEPC databases hazardous material information it receives and provides that data to emergency response organizations. Plans and facility information are made accessible to the public during business hours. The *LEPC* can take civil action against facilities that fail to comply. Membership in the LEPC is open to the public.

Description:

The Greene County *Soil and Water Conservation District* assists area landowners with the development and implementation of various conservation practices and programs in the county. The district encourages and promotes no-till forage and pasture management, as well as animal waste management. The *SWCD* places high emphasis on education programs for landowners as well as students in the county. Technical advice is provided on many areas including erosion problems, pond sites and construction, and abandoned well sealing. The *SWCD* pays part of the costs necessary for landowners to complete various conservation practices. This cost-share assistance is available for qualifying farmlands. The *SWCD* also has equipment available for rent.

The Greene County *SWCD* works in cooperation with the Natural Resources Conservation Service, formerly the Soil Conservation Service.

Springfield/Greene County Environmental Advisory Board

Department Springfield-Greene County
Environmental Advisory Board

Contact Karen McKinnis

Position Administration Administer

Address 227 E. Chestnut Expressway

City Springfield, MO 65802

Telephone (417) 864-1623

Fax number (417) 864-1099

Description:

FOG (Fats, Oils and Grease) Program - The City of Springfield has implemented a Fat, Oils, and Grease (FOG) Management plan. This program will apply to Food Service Establishments that discharge wastewater to the City of Springfield (City) wastewater collection system, and will involve permitting and inspecting these facilities. The purpose of this program is to provide the implementation of a fat, oil, and grease (FOG) management program providing protection for the City wastewater collection and treatment systems, equipment, and staff. The objective of the FOG management program includes, but is not limited to:

- The minimization of the introduction of and/or removal of FOG and other soluble material associated with food preparation discharged to the City wastewater collection system.
- Provide effective means of interception and removal of FOG and associated soluble material through proven effective FOG interceptors and Grease Recovery Units. The program shall apply only to commercial food preparation establishments connected to the City wastewater collection system.

The program shall also apply to any commercial facility where the City of Springfield wastewater collection system is available and reasonably accessible, whether connected to the wastewater collection system or not.

Infiltration and Inflow (I/I) Program – The City of Springfield's Infiltration and Inflow (I/I) Program works to maintain and improve the efficiency of the City's sanitary sewer collection system and

treatment plants and to prevent sewer overflow and backups. What is Infiltration/Inflow (I/I)? - Infiltration occurs when groundwater enters the sewer system through cracks, holes, faulty connections, or other openings. Inflow occurs when surface water such as storm water enters the sewer system through roof downspout connections, holes in manhole covers, illegal plumbing connections, or other defects. The sanitary sewer collection system and treatment plants have a maximum flow capacity of wastewater that can be handled. I/I, which is essentially clean water, takes up this capacity and can result in sewer overflows into streets and waterways, sewer backups in homes, and unnecessary costs for treatment of this water. It can even lead to unnecessary expansion of the treatment plants to handle the extra capacity. These costs get passed on to the consumer.

Industrial Pretreatment Program - The *Industrial Pretreatment Program*, within the Clean Water Services Division of the City of Springfield Department of Environmental Services, is responsible for the enforcement of Chapter 120 of the Springfield City Code known as the “Wastewater Regulation.” The provisions of this Chapter apply to the discharge of all wastewater into the Publicly Owned Treatment Works (POTW) by providing for the use of POTW, regulations of sanitary sewer construction, control of the quantity and quality of wastewater discharged, industrial wastewater pretreatment, alternate treatment facilities, equitable distribution of costs, assurance that existing capacity will not be exceeded, approval of sewer construction plans, issuance of Wastewater Contribution Permits, minimum sewer connection standards, conditions, penalties, and enforcement provisions for violations of Chapter 120.

Inquiries regarding the use of the POTW, wastewater discharge and pretreatment, Wastewater Contribution Permits, and enforcement of Wastewater Regulations should be directed to Randy Lyman at the above address. Questions relating to sanitary sewer construction, connection standards, charges, and conditions should be directed to Bill Knuckles at (417) 864-1931. For educational tours of the wastewater treatment facilities and environmental laboratory, contact Kelly Green at (417) 891-1600, ext. 121.

City of Springfield – Solid Waste Management Division

<u>Branch</u>	Solid Waste Management Div.
<u>Department</u>	Environmental Services
<u>Contact</u>	Barbara J. Lucks
<u>Position</u>	Interim Sustainability Officer
<u>Address</u>	Environmental Resource Center 290 E. Central Street
<u>City</u>	Springfield, MO 65802
<u>Telephone</u>	(417) 864-1905
<u>Recycling Hotline</u>	(417) 864-1904
<u>Website</u>	www.springfieldmo.gov/recycling
<u>Fax number</u>	(417) 864-1906
<u>Mission areas</u>	Solid waste management, recycling, waste reduction, composting, household chemical disposal, business assistance
<u>Programs available</u>	Advisory, regulatory, curriculum, public education, research, training, volunteers, business assistance

Description:

The City of Springfield’s *Division of Solid Waste Management* is committed to the fiscally and environmentally sound management of Springfield’s “trash” through an Integrated Solid Waste Management System approach. Curbside recycling is provided by private haulers. The following components are provided by the City, funded by the tipping fees paid at the Springfield Sanitary Landfill:

- The *Household Chemical Collection Center* serves non-commercial Springfield residents (located at 1226 W. Nichols) and reuses or recycles over 80% of the materials it receives. It also facilitates disposal assistance for CESQG businesses. Please call 864-2000 for more information.
- The *Yardwaste Recycling Center* provides one-stop shopping by accepting yardwaste including brush and limbs and offering high-quality compost and landscaping mulch.
- The *Recycling Centers* are collection centers that accept a variety of recyclables such as mixed paper, glass, plastic bottles, milk jugs, aluminum cans, etc. Locations, hours, etc. are available on the web or hotline.
- *Market Development* is undertaken to increase the availability of a dependable source of recycled materials and to encourage the use of these items in manufacturing. Business assistance for waste reduction is also available.
- *Public Education* involves working with the community to increase awareness of the value and technology of sound solid waste management practices.
- *Springfield Sanitary Landfill* provides accessible, affordable and environmentally responsible solid waste disposal. Tipping fees generated by the landfill fund the Integrated Solid Waste Management System (ISWMS).

City of Springfield – Stormwater Engineering Division

<u>Branch</u>	Stormwater Engineering Division
<u>Department</u>	Public Works
<u>Contact</u>	Carrie Lamb
<u>Position</u>	Water Quality Coordinator
<u>Address</u>	840 Boonville Avenue
<u>City</u>	Springfield, MO 65802
<u>Telephone</u>	(417) 864-1996
<u>Fax number</u>	(417) 864-1907
<u>E-Mail</u>	clamb@springfieldmo.gov
<u>Mission areas</u>	Stormwater quality, flood management
<u>Programs available</u>	Advisory, regulatory, public education
<u>Website</u>	www.springfieldmo.gov/stormwater

Description:

The Stormwater Services Division is committed to the development of stormwater solutions to meet the needs of the community and to protect our streams and lakes. The Division provides a variety of services including reviewing stormwater plans for new developments, regulating erosion and sediment control on construction sites, mapping the stormwater system and sinkhole areas, and designing and constructing improvement projects to reduce flood hazards and improve water quality. The Division is also responsible for implementing the City's federally mandated stormwater permit. Under this permit, the City has developed a Stormwater Management Program that includes the following efforts to protect water quality.

Sampling of urban streams

- Water quality monitoring of urban streams and stormwater runoff
- Investigating pollution (To report pollution, call 417-864-1011)
- Permitting and inspecting construction sites for erosion and sediment control
- Working with industries and businesses on stormwater pollution prevention
- Promoting and constructing green infrastructure projects such as rain gardens, rainwater harvesting, and pervious pavement to manage stormwater in a way that uses and mimics nature
- Educating and involving the public on stormwater pollution prevention and water quality protection
- Adopt-A-Stream volunteer program for stream cleanups

City of Springfield – Sustainability Division

<u>Branch</u>	Sustainability Division
<u>Department</u>	Environmental Services
<u>Contact</u>	Barbara J. Lucks
<u>Position</u>	Interim Sustainability Officer

<u>Fax number</u>	(417) 864-1906
<u>Mission areas</u>	To support and encourage environmental practices in Springfield and Greene County that are environmentally sound and economically feasible which represents a long-term solution to preserve the national resources of the region for present and future generations.
<u>Programs available</u>	Public education, research, training, curriculum, volunteers

Description:

The City of Springfield’s Department of Environmental Services Sustainability Divisions Education Outreach Section includes: Coordination and delivery of educational activities for the Department of Environmental Services facilities listed in this book. Resources include: Brochures, recycling hotline, website, activity guides, trade-show type displays, check-out kits, DVD’s and more. Programs include: Show-Me Yards & Neighborhoods (Environmentally Responsible Lawn Care), vermicomposting (classroom food waste complete with living worms), interactive activities for special events (ex: Recycling Relay Race, Recycling Bean Bag Toss Game, etc.), and special event recycling. Focus areas include: Air Quality, Water Quality, Water Conservation, Stormwater Management, Solid Waste Management/Recycling, Waste Water Management, and Sustainability. The Market Development Section offers technical assistance to businesses/industries and supports the Ozarks GreenScore Program, Ozarks Clean Air Alliance and other similar efforts.

City Utilities of Springfield

<u>Contact</u>	Dave Fraley
<u>Position</u>	Director-Environmental Affairs
<u>Address</u>	301 East Central
<u>City</u>	Springfield, MO 65802
<u>Telephone</u>	(417) 831-8778 (D. Fraley)
<u>Fax number</u>	(417) 831-8771 (D. Fraley)
<u>E-mail</u>	dave.fraley@cityutilities.net
<u>Website</u>	www.cityutilities.net
<u>Mission Area(s)</u>	Energy services, drinking water, public transportation, telecommunications
<u>Programs available</u>	Plant tours and other educational outreach programs. Speakers bureau on a variety of energy, environmental, and water quality topics. Speakers bureau contact is Chris Vallely, 831-8433.

Description:

City Utilities of Springfield is a municipally owned utility providing electric, natural gas, drinking water, transit and broadband services to the Springfield metropolitan area. Electricity is generated at the James River Power Station and John Twitty Energy Center via coal-fired steam units and gas and oil-fired combustion turbines. Plant tours include a discussion of environmental regulations affecting plant operations, as well as the technology used to control and continuously monitor air emissions.

CU's Fulbright and Blackman Water Treatment Plants are the largest drinking water works in the region. Plant tours explain the entire treatment process from source water protection to safe drinking water production.

CU also provides educational programs through local schools and civic groups. Curriculum offerings include resource conservation, especially with respect to water and energy.

City of Republic – Wastewater Treatment Plant

Department Wastewater Treatment Plant

Contact Craig R. Lusby

Position Superintendent

Address 221 N. Main

City Republic, MO 65738

Telephone (417) 732-3460

Fax number (417) 732-3499

Mission areas Waste, water quality

Programs available Regulator

Description:

The primary objective of the *wastewater treatment plant* is to protect the environment and improve the downstream water quality. Raw domestic sewage is treated to remove organic solids (dissolved and suspended) and some inorganic solids. The *treatment plant* accelerates natural processes using bacteria to break down the waste in order to produce clean water.

<u>Mission areas</u>	Conservation education, habitat preservation and restoration
<u>Programs available</u>	Public education and outreach (Power Point presentations), field trips/nature walks, Green Leadership Academy on Diverse Ecosystems (GLADE), Audubon Adventures

Description:

Local members belong to the National Audubon Society, a group of over 600,000 people who are conservation minded and concerned with quality of life. Many are wildlife watchers, especially birds. Awareness of the interdependence of all living things is raised through the study of birds. The Audubon Society fosters this study and is committed to community service and environmental education for the conservation of wildlife and natural resources. Power Point programs are offered throughout the year on a variety of topics including bird identification, bird feeding, landscaping for wildlife, installing rain gardens, wildflower identification, butterfly identification, birding in foreign countries, and many other topics. A Speaker's Brochure describing programs is available upon request.

The *Greater Ozarks Audubon Society (GOAS)* oversees the following conservation programs: South Creek habitat restoration project, four Bluebird trails, Adopt-A-Street cleanups, and cleanup and habitat restoration at public spaces such as Lake Springfield and Valley Water Mill.

GOAS also provides Audubon Adventures, an award winning environmental education program produced by the National Audubon Society, to over 30 elementary classrooms in Springfield and surrounding areas.

GOAS in partnership with MSU, CFO and many other local organizations, conducts a week-long, residential conservation leadership academy for high school juniors and seniors at the MSU Bull Shoals Field Station (GLADE). For more information contact Director Greg Swick, 417-581-2757.

Urban Soil Test Rebate, Septic
Tank Pump-out Program, Storm
Water Initiative

Description

James River Basin Partnership is a citizen-based organization working on water quality issues in the James River and Upper White River Basins. The JRBP vision is, “Clean water for you, your children, and your grandchildren.” The organization’s mission is, “Working to protect and improve the water quality in our springs, streams, rivers, and lakes.” Goals to meet the mission:

1. Implement water quality evaluation protocol
2. Implement programs to positively impact water quality
3. Increase citizen participation in water quality issues
4. Develop sustainable funding sources

Currently areas of focus include: scientific research, public outreach and education. The Science Committee is composed of JRBP board members and members of the local scientific community. Current projects are: Show-Me Yards, Neighborhoods, Farms and Ranches 319 Project, Nutrient Management Planning, Big Urbie 319 Project, Promote Low Impact Development, Watershed Management Planning, Septic Tank Pump-out, Urban Soil Testing, River Rescue Clean-up, and County-wide Watershed Festivals. To achieve public education, JRBP holds membership meetings, produces the current newsletter, and hosts other informational events. Grants and community financial support fund JRBP programs.
